<p>Distribution of the Earth's Water
```

The Earth is known as the "Blue Planet" because water covers 71 percent of its surface.

Water may also be found under the earth's surface and as water vapor in the atmosphere. Water is a scarce resource.

The world contains a lot of water, but only a tiny fraction of it (approximately 0.3 percent) is useable by people.

    <h1>Importance Of Water & Sanitation</h1>

    <p>
```

Lots of people across the world continue to lack access to safe and clean drinking water. Human existence depends on clean water.

As we all know, washing hands with soap has proven to be one of the best preventative measures available to save lives, but the reality

service or toilet.

• Access to drinking water affects education

Without drinking water, children often must miss school (584 million children lack basic

drinking water in school), fall behind and drop out of school. Access to basic water, sanitation and hygiene (WASH) is

widely recognized as an essential part of a healthy learning environment. For adolescent girls, schools provide an important entry

point to overcome barriers to menstrual hygiene management (MHM), especially if they are struggling to manage their periods with

dignity and confidence in an unsuccessful school environment. not full MHM support, let alone privacy, cleanliness and secure facilities.

"A drop of water is worth more than a sack of gold to a thirsty man"

"You will never solve poverty without solving water and sanitation"

Water Resources

Water resources are natural resources of water that are potentially useful as a source of water supply.

Natural sources of fresh water include surface water, under river flow, groundwater and frozen water. Artificial sources of fresh water can

include treated wastewater (reclaimed water) and desalinated seawater.

Of these, the resources most available for use are the waters of the oceans, rivers, and lakes other

available water resources include groundwater and deep subsurface waters and glaciers and permanent snowfields. We are responsible for

protect those water resources.

<div class="col pt-5 mt-5 mb-4 ">
```

```
<h3 class="display-8 fw-bold">Water Pollution Effects</h3>
```

```
<p class="lead mb-4 text-center"><b>On The Environment</b><br/> Water pollution truly harms biodiversity and aquatic ecosystems. The toxic chemicals can change the color of water and increase the amount of minerals - also known as eutrophication - which has a
```

```
bad impact on life in water.
```

```
<br/><br/><b>On Human Health</b><br/> A lot of diseases result from drinking or being in contact with contaminated water, such as diarrhea, cholera, typhoid, dysentery or skin infections. In zones where there is no available
```

```
drinking water, the main risk is dehydration obviously.
```

```
<br/>

      <h1 class="display-5 fw-bold lh-1 mb-3">Causes of poor sanitation</h1>
```

```
      <p class="lead">Globally, the most significant cause of poor sanitation is a lack of education. Even the simple act of washing hands on a regular basis can have a significant impact on a community's overall health. Let's look at a few of the factors
```

```
        that contribute to poor sanitation.<br/>
```

```
        <span style="font-weight:bold;">    Open defecation</span><br/> Open defecation pollutes the environment and is a leading cause of preventable disease transmission.<br/>
```

```
        <span style="font-weight:bold;">    Unsafe drinking water</span><br/> Each year, it is estimated that unsafe, untreated, and contaminated drinking water causes more than 500,000 diarrhoeal fatalities. Simple sanitary measures and
```

```
        clean drinking water could avoid many of them. In locations where clean drinking water is scarce, diseases such as diarrhoea, cholera, dysentery, typhoid, and polio are common.<br/>
```

High density living In regions where informal or semi-permanent settlements emerge, the high density of these areas, along with limited access to sanitation programs and supplies, implies

that sewage and garbage are likely to be improperly handled.

Lack of education This is a relatively simple issue to address, as education often begins in the form of school programs that educate youngsters the value of good hygiene, waste management,

clean drinking water, and hand washing.

```

<p class="lead mb-4 text-center">
```

Filtration, Ultraviolet Sterilization (UV), Ozonation, Nano filtration, Ultra Filtration, Reverse Osmosis, De-salination are some of the treatment methods. There are many filtration methods have been created by various organizations in the world and people can purchase according to affordable price. World Health

Organization has published the parameters of the water for the suitable drinking water. Any person can test their water by using these standards and they can select treatment methods according to water analysis report.

</p>

</div>

<div class="col pt-5 mt-5 mb-4 ">

<h3 class="display-8 fw-bold">Solution 2: Capture and disposal of airborne pollutants in waterways</h3>

<p class="lead mb-4 text-center">

Floating pollutants can be contained and recovered relatively easily using a floating boom.

The boom is designed to act as a barrier to airborne water pollution.

Floating material can be contained, deflected, or eliminated, depending on how the boom is mounted.

There is a boom in managing and disposing of almost all airborne pollutants in manageable locations, from garbage and seaweed to oil.

There are many ways to use booms, but they generally fall into one of two categories: debris booms and oil booms.

</p>

</div>

<div class="col pt-5 mt-5 mb-4 ">

<h3 class="display-8 fw-bold">Solution 3: Capture and filter water containing waterway deposits</h3>

<p class="lead mb-4 text-center">Coastline construction projects disrupt and expose soil, creating a situation where exposed soil is washed away into nearby waters. This produces (turbid) water containing turbid sediments, which has a significant negative impact on the marine environment. It harms all aquatic life in the area, including plants, fish, insects and animals. Muddy water can also be caused by events that stir the sediments on the seafloor. For example, pipes and streams released into waters at high speeds stir floor sediments and create turbidity. Dredging and underwater construction projects (dock construction, power line pylon, etc.) also generate turbid water that needs to be managed. Turbidity barriers are the most common solution for controlling sediment-filled water (also known as silt curtains). They are floating barriers designed to contain turbid water, allowing sediment to settle in the contained area.

```

      Suitable for sites where digging of latrines is not feasible or suitable.

```

```

      Well suited to areas with high water table or where flooding occurs.

```

```

      Larger tank requires less frequent emptying.<br/>

```

```

      <span style="font-weight:bold;">      Chemical Toilets</span><br/> A portable prefabricated
      sanitary unit with a watertight excrement retention tank containing a chemical solution to aid digestion and
      reduce odor. Portable.

```

```

      Hygienic.

```

```

      Minimize odor.

```

```

      Can be mobilized rapidly.

```

Demonstrated success in the Dominican Republic 2003 flooding.

Well suited to areas with high water table or where flooding occurs.

Promote good sanitation habits through education. “We must remember that the soap will finish, but the education we provide to children will never end.”
Pathogens derived from faeces can be transmitted from an infected host to a new host in a variety of ways. Therefore, it is very important to promote practices that can prevent the transmission of pathogens that cause diarrhea. These practices include washing hands with soap, handling food properly, and purifying water. The incidence of diarrhea can be dramatically reduced if proper hygiene is available and hygienic behavior is improved. Improvements can be expected in other areas, such as a cleaner environment, safer water and food, better nutrition and thus improved learning for school children, and improved dignity and privacy for all, especially women.
